Full Stack Web Developer / Project Lead

Stealth Solutions and Digital Marketing, April 2024 - Present

Philippine Office (Onsite): April 2024 - June 2025

Remote / Freelance (Stealth Solutions & Digital Marketing – NY): June 2025 - Present

- Successfully built multiple e-commerce websites using the TALL stack (Tailwind CSS, Alpine.js, Laravel, and Livewire), significantly enhancing the company's online presence and driving customer engagement, with strong SQL proficiency for effective data management and retrieval.
- Developed and contributed to multiple CRM systems, streamlining the creation and management of e-commerce websites, and boosting operational efficiency.
- Effectively collaborated with designers, product managers, and QA testers in an Agile environment to deliver high-quality software solutions.
- Promoted to an additional role as a Project Lead to a project with over 50 e-commerce websites, a CRM, CMS, and an Affiliate Tracking System.
- Awarded the Director's Choice Award (March 2025) for excellence in the Web Developer division.
- Led a telehealth platform project featuring a CRM integrated with multiple pharmacies, doctors, and laboratory systems via APIs.
- Developed company-wide reusable packages to standardize and speed up deployment across multiple sites.

IT Specialist (Systems Developer)

ANC+ Group of Companies, July 2022 - April 2024

- Spearhead the development and implementation of innovative systems to streamline company processes, enhance efficiency, and improve user experiences.
- Conduct comprehensive training and orientation sessions for end-users, ensuring seamless adoption and utilization of the developed systems.
- Collaborate closely with cross-functional teams to gather requirements, analyze business needs, and deliver tailored solutions.
- Continuously maintain and enhance existing systems, troubleshoot issues, and provide timely technical support to users, resulting in the closure of over 1200 tickets.
- Supervise on-the-job training IT employees, providing mentorship and guidance to enhance their technical skills and proficiency in using developed systems.

PROJECTS

Full Stack Developer | Stealth Solutions & Digital Marketing

Total Male Rx | admin.totalmalerx.com

Timeline: May 2025 - Present

Project Description: Developed a custom men's telehealth CRM managing patients, consultations, prescriptions, and orders, with API integrations to U.S.-licensed physicians, pharmacies, and fulfillment providers.

Language: HTML, JavaScript, CSS, PHP and SQL

Framework: Laravel, Livewire, Tailwind CSS and Filament

Status: Successfully deployed to production and actively supporting live telehealth operations, patient management, and prescription fulfillment.

Full Stack Developer | Stealth Solutions & Digital Marketing

Adzio Pro Tracker | apt.adzioaffiliatenetwork.com

Timeline: October 2024 - January 2025

Project Description: Independently led the end-to-end development of Adzio Tracker, an affiliate tracking system connected to various e-commerce websites and their affiliates.

Language: HTML, JavaScript, CSS, PHP and SQL

Framework: Laravel, Livewire, Tailwind CSS and Filament

Status: Successfully deployed to production and now actively tracking affiliate's conversions.

Full Stack Developer | Stealth Solutions & Digital Marketing

Adzio Affiliate Network | crm.adzioaffiliatenetwork.com

Timeline: July 2024 - Present

Project Description: Developed a custom CRM for e-commerce, handling orders, subscriptions, and customer management. Integrated Authorize.Net for payments, IPQS for fraud detection, and other third-party services.

Language: HTML, JavaScript, CSS, PHP and SQL

Framework: Laravel, Livewire, Tailwind CSS and Filament

Status: Successfully deployed to production and now actively managing orders from the created e-commerce sites.

Full Stack Developer | ANC+ Group of Companies

Online Employee Requisition Form System | oerf.ancplus.com

Timeline: May 2023 - August 2023

Project Description: Independently led the end-to-end development of the Online Employee Requisition Form System, streamlining the HR requisition process and enhancing operational efficiency.

Language: HTML, JavaScript, CSS, PHP and SQL

Framework: Laravel, Livewire, Tailwind CSS and AlpineJS

Status: Successfully deployed and integrated into the company's HR infrastructure.
